SWRS Southwest Recovery Services

Providing Creative Solutions to Common Problems

COMMERCIAL & B2B SAAS RECOVERY · CAPABILITIES OVERVIEW

Debt Collection Agency for Businesses

Recovering unpaid subscription invoices & past-due B2B receivables — on pure contingency

Prepared for **Procurify** · July 2026

01 — INTRODUCTION

A recovery partner for the invoices that go quiet

To Myra Ayre and the Procurify finance team — the hardest dollars a SaaS business collects are the ones a customer stops paying after the value is already delivered: renewals that lapse, subscription and usage invoices that age past terms, and accounts that simply go silent once they've decided to churn.

Past-due receivables aren't a support problem — they're a cash-flow and DSO problem. Every invoice that drifts past terms ties up working capital you've already earned, drags your days-sales-outstanding, and quietly becomes a write-off. And once a customer has churned, your leverage drops: the relationship is cooling, the billing contact has moved on, and follow-up falls to a finance team that already has a full plate.

Recovering those balances takes what an in-house AR function can't sustain at volume — **persistent multi-channel demand, commercial skip tracing on the business and its principals, and a documented, dispute-respecting process** — applied to every account without letting the good customer relationships suffer.

That's our lane. Southwest Recovery Services is a commercial, B2B-focused collection agency working business receivables on **pure contingency since 2004**, with recovery reach across all 50 states. You place accounts through a secure portal that takes your billing / AR-aging export, and we work them. No recovery, no fee.

02 — AT A GLANCE

Two decades of commercial recovery — nationwide

A track record built on high-volume B2B receivables and a documented, professional process — the scale and persistence a growing SaaS finance team can plug in without hiring for it.

2004 Recovering commercial receivables since	**$975M+** Receivables placed (all industries)	**$76M+** Recovered for clients	**800K+** Accounts worked
52% of placed accounts see a recovery	**50** states — nationwide recovery reach	**4.9★** Google client rating	**$0** upfront — no recovery, no fee

- Commercial & B2B collections since 2004
- Nationwide — all 50 states
- 12 offices across 7 states
- Skip tracing on businesses & principals
- Contingency — no recovery, no fee

ACCREDITED & RECOGNIZED

Your four questions — answered directly

Exactly what you asked, in order, plus the details that matter for a B2B SaaS receivables book.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
1. Fee structure	Pure contingency — $0 upfront, no retainer, no monthly minimum, no sign-up or placement fee. You pay a pre-agreed percentage *only* of what we actually recover; if an account collects nothing, you owe nothing on it. Commercial contingency scales with the age, balance size and volume of your placements — fresher, higher-balance, higher-volume portfolios price at the low end of the range. We quote your rate once we see a representative sample of your U.S. receivables, so it reflects your actual book rather than a generic table.
2. Disputed invoices	A dispute pauses recovery — it doesn't end it. We validate the account against the paper: the signed order form or MSA, itemized invoices and statements, service / usage records, and the full communication trail. We speak with both sides to understand the dispute. A legitimately documented one (a genuine billing error or service issue) goes back to your team with a recommendation; a stall tactic — "lost invoice," a vague "we weren't happy" — is worked through professionally with the documentation in hand. For SaaS, your order forms, product usage logs and access records are usually decisive. Dispute investigation typically adds 30–60 days to the timeline.
3. Non-responsive customers	This is the core of what we do. When a customer stops answering your invoices and emails, we escalate past what an in-house AR team can sustain: persistent, documented **multi-channel outreach** (phone, email, letter, text); **commercial skip tracing** to locate the current operating entity, successors, and the principals or guarantors behind a business that has gone quiet, moved or restructured; and, for accounts that still won't engage, review of **legal escalation** with you — formal demand from counsel, suit on the account, and judgment enforcement. A third-party demand on agency letterhead alone resolves a meaningful share of "silent" accounts.
4. Onboarding & placement	Fast and low-lift for your team. You place accounts through our secure client portal — bulk-upload an AR / aging export from NetSuite, QuickBooks, Stripe or your billing system (CSV / Excel), or place accounts individually. We map your export columns — customer, invoice, amount, due date, PO / contract — to our intake, so there's no manual re-keying and you can place an entire past-due batch at once. Outreach typically begins within 24–48 hours of a documented placement. Payments a customer makes directly to Procurify are logged back so balances stay accurate and no one is over-contacted.

YOUR QUESTION	SOUTHWEST RECOVERY SERVICES
What we recover	Unpaid SaaS subscription and renewal invoices, usage / overage charges, implementation and professional-services fees, license and platform fees, and any past-due B2B trade receivable — from current customers, churned customers and closed accounts alike.
Geography & cross-border	Our recovery reach is nationwide across all 50 U.S. states — the right fit for a U.S. customer portfolio. Because Procurify is Canada-based with international customers, we scope placements around your U.S. accounts first and handle Canadian / international balances through our legal-forwarding network case by case. We flag any account outside our direct footprint up front — no surprises.
Timing & speed	Outreach begins within 24–48 hours of placement; fresh commercial accounts (under roughly 90 days past due) often resolve within 30–60 days. Recovery falls as accounts age, so a standing “place at 90 days” rule recovers materially more than letting balances sit.
Compliance & standing	Commercial B2B debt is not consumer debt, so the FDCPA’s consumer restrictions don’t apply — but we hold every account to the same professional, documented, dispute-respecting standard. Licensed and bonded where required, ACA International member, with a clean compliance record since 2004.

THE SWRS CLIENT PORTAL

Billing-system-ready intake and full visibility, on demand

Every placement is managed through our secure portal at **swrsportal.com** — built to take your AR / billing exports and give your finance team live, self-service access throughout recovery, backed by a dedicated account manager.

BILLING-SYSTEM-READY PLACEMENT

Upload an AR / aging export from NetSuite, QuickBooks, Stripe or your billing system (CSV/Excel), or place accounts individually — we map your columns, no re-keying.

SECURE FILE EXCHANGE

Send order forms, MSAs, invoices and statements safely inside the portal, not over email — the documentation that resolves disputes fast.

REAL-TIME REPORTING

Run and export account and recovery reports on demand — a live dashboard for your DSO and recovery, not a monthly summary.

DIRECT-PAYMENT REPORTING

Log payments a customer makes directly to Procurify, so balances stay accurate and no one is over-contacted.

ACCOUNT STATUS & LOOKUP

Search any account for milestones, collector notes, payment history and clear status codes.

ROLE-BASED ACCESS & MFA

Standard and manager roles with multi-factor security — built for a finance team with several users.

04 — HOW COMMERCIAL RECOVERY WORKS

Submit the account. We work it.

A clear, six-step process from placement to resolution — the same whether it's a single churned account or a full past-due batch out of your billing system.

1 · Account placement

Provide the customer, invoice, amount, due date and PO / contract — or bulk-upload your AR export. We verify documentation and compliance; outreach begins within 24–48 hours.

2 · Skip tracing & verification

We locate the business's current operating entity, successors and principals, and validate contact data across multiple sources when a company has gone quiet or moved.

3 · Demand & direct contact

Professional multi-channel outreach — phone, email, letter and text — on a persistent, documented cadence, opening with third-party demand on agency letterhead.

4 · Negotiation & payment plans

Where a customer can't clear the balance at once, we structure documented payment arrangements. More accounts resolve when there's a realistic path to zero.

5 · Escalation

For accounts that won't engage, we escalate — commercial-credit consequences where reportable and formal demand from counsel.

6 · Legal action

Suit on the account and judgment enforcement, reviewed and approved with you, as a final resort for balances that justify it.

05 — CASE STUDIES

SWRS Commercial Recovery Case Studies

Actual placed-versus-recovered results from Southwest Recovery's commercial book, anonymized by sector. Recovery varies with account age, balance and documentation quality — fresher, well-documented placements recover best.

THE DSO ADVANTAGE

Why fresh commercial invoices recover best

Most B2B businesses target days-sales-outstanding of 30–60 days — and the same age curve governs recovery. A commercial balance is most collectible while it's fresh; every month it ages, contact data goes stale and your leverage erodes. The single highest-leverage change most finance teams make isn't chasing harder — it's placing sooner.

THE AGE CURVE

Fresh accounts (under ~90 days past due) often resolve in 30–60 days. Balances that sit for a year collect a fraction of that — the decline is steep and it doesn't reverse.

THE STANDING RULE

A fixed "place at 90 days" policy, applied to every past-due account, recovers materially more than letting balances drift toward write-off — and on contingency there's no cost to placing.

Recovery figures vary by portfolio; Southwest Recovery gives an honest, age-based read on a representative sample before any accounts are worked.

06 — BUILT FOR B2B & SAAS RECOVERY

We speak your ledger

A recurring-revenue receivables book creates a specific recovery profile. Our playbook is built for exactly that.

Churned & non-responsive accounts

Commercial skip tracing on the business and its principals, plus persistent multi-channel demand for customers who have gone silent — standard on every placement.

Disputed & contested invoices

Documentation-driven validation — order forms, MSAs, itemized invoices and usage logs — that separates a genuine dispute from a stall tactic and keeps recovery moving.

Every commercial balance type

Subscription and renewal invoices, usage overages, implementation and professional-services fees, license and platform fees — one partner, one portal.

Nationwide reach

Recovery across all 50 states from 12 offices in 7 states — built for a U.S.-wide SaaS customer base, with cross-border accounts scoped up front.

Recovery run on an AI-driven platform — Aktos

Every account SWRS works runs on Aktos, a next-generation, AI-driven collections platform — with compliance built into the workflow, not bolted on afterward. It's how a boutique, people-first agency delivers enterprise-grade speed, consistency, and auditability.

AI workflow automation

Repetitive steps are automated and every account is scored and routed by predicted payment likelihood — so the right strategy reaches the right account first, without manual queue-picking.

Omnichannel outreach

Coordinated email, SMS, and voice, timed to when a debtor is most likely to engage — replacing high-friction call blasts with respectful, data-driven contact.

Compliance built in

FDCPA, Reg F, and TCPA guardrails are enforced inside the automation, with phone-number and consent checks before outreach — documented and defensible on every account.

Real-time dashboards

You see status, segmentation, and recovery performance on your portfolio in real time — full transparency, not a monthly PDF.

API-first intake

Secure SFTP/API placement means accounts start working without data lag — roughly 50% faster acknowledgment and validation of new placements.

Data-driven scoring

Dynamic scoring and segmentation predict payment likelihood and concentrate effort where recovery is most achievable — earlier intervention that trims DSO and reduces disputes.

The result is the combination clients rarely get from a legacy agency: faster cash and cleaner compliance at the same time. Automation accelerates recovery and standardizes documentation, while empathy-first, data-driven contact protects your brand and keeps disputes and complaints low.

Built by a collector with 30 years on the phones — not a CEO with zero collection experience

Steven Dietz

Founder & Chief Executive Officer

Featured in USA Today, International Business Times & Financial Services Review — Top AR Management Service, 2025 · ACA International member.

Steven Dietz didn't come to collections from the corner office — he came from the phones. He started as a collector and credit analyst before he was 20, was tapped by Aaron's to train collectors across 100+ locations, and has spent nearly 30 years in receivables. Along the way he became convinced the industry's bad reputation was a choice, not a requirement: businesses get paid faster when recovery is built on listening and respect rather than aggressive calls and empty threats.

He founded Southwest Recovery Services in 2004 on that principle — a national, family-owned receivables partner that treats every debtor as a person and every client relationship as worth protecting. Two decades later he still coaches the teams and works accounts personally — an operator who has actually done the job, not a manager who has only overseen it.

> "Regardless of the means of recovery, our focus is always on preserving goodwill and representing the client professionally.
>
> **— Steven Dietz, Founder & Chief Executive Officer, Southwest Recovery Services**

In SaaS especially, a past-due customer today can be a renewed customer tomorrow — and B2B markets are small. Firm, effective recovery has to stay professional:

no threats, no misrepresentation. That protects the customer relationship, protects Procurify’s brand, and protects you from the liability that sloppy collections create.
